

Carsington Fishery Report 12th August 2013

Its been a slightly better week for fishing showing a slight increase in the rod average to 1.97. The cooler temperatures have certainly helped. Fish are still being caught in deeper water and most people have been fishing off the drift on calmer days. In addition to our rainbow catches there have been a large number of perch caught!

*Sorry no rainbow pictures this week just a Perch!!
Caught by John Wilson*

Rod Average

The rod average for this week was **1.97** with 65 fish caught by 33 anglers.

Best Rainbow/Brown

The heaviest rainbow this week was 3lbs 11oz caught by M H Margetti.
No browns were recorded this week

Top Spots

The most successful areas have been in the deeper sections of Stitch Plantation, Fishtail creek, Millfields, North End and drifting from the east side towards the middle of the reservoir around buoys 4,5 & 6.

Method & Flies

The most successful patterns are cats whiskers, red booby, green & black fritz, minnow and hot head damsel. Sinking lines have been a must this week. The fish are most certainly deep in the cooler water. Bright and sparkly fly patterns are also helping to entice the fish out of the weed beds.

Fishing For Heroes Competition, Saturday 12th October 2013 National Still Water Regional Heat at Carsington Water

Please contact us if you are interested in fishing this pair's match to help raise money for a great cause. The cost is £60.00 per pair plus a minimum of £50 sponsorship from each competitor.
