

Carsington Fishery Report 1st April 2013

Fishing has only taken place from Friday onwards this week due to the extreme weather conditions and access to site. Those anglers that have braved the elements have successfully caught giving us a rod average of 4.38. The picture below shows a lovely 2lbs 4oz rainbow caught by Seth Grimes near Halfmoon Field unfortunately his second fish of the day was lost on its way to the net.

Rod Average

The rod average for this week was **4.38** with 35 fish caught by 8 anglers.

Best Rainbow/Brown

The heaviest rainbow this week was 2½ lbs caught by many of this week anglers. No browns were recorded this week.

Top Spots

Once again the most successful areas have been close to the shorelines. The best areas are Towerbank, Osprey Towers, Halfmoon Field, Dam Wall and Millfields. Many returns stated that fish were caught all over showing that it is best not to stay in one place for long.

Method & Flies

The most successful patterns are Black lures, coral booby, green & black fritz, black tadpole and diawl bach. A mixture of intermediate and floating lines have been used, interestingly some fish have been found closer to the surface than expected and other have been near to the bottom but in shallower depths of water.

New Arrival

This week we took delivery of our first of three new boats. Following the success of the Coulam Wheellie boat we have ordered three new Coulam 16 boats. People who have used them before will be aware that they are very good on large waters and are slightly larger than our current fleet. This boat will be available for hire from Monday 8th April with the others to follow soon.

Boats can leave the jetty from 8.30am

All boats are back to the jetty by 7.00pm

Please allow a few minutes to return from your fishing spot

Please note that Carsington is a boat fishing water only. It is advisable that boat bookings are made in advance to avoid disappointment. Discounts are available for bookings of 5 or more boats.
