

# Carsington Fishing Report

21<sup>st</sup> July 2014

It has been another hard week of fishing with warm still conditions. Most anglers have had success in deeper water on the edge of the weed beds. Also the North end of the reservoir seems to be fishing very well with the use of floating lines and dry flies.

*Remember the tagged fish is still out there to be caught.*

## Rod Average

The rod average for this week was **2.37** with 109 fish caught by 46 anglers.

## Best Rainbow/Brown

The heaviest rainbow caught this week was 3lbs 9oz by Tony Clever at the North End

The heaviest brown caught was 2lbs 4oz caught by Paul Pearce at the North End on a Cats Whisker.

## Top Spots

The most successful areas have been North End, Dam Wall, Brown Ale Bay, Fishtail Creek. Fish have been reported over the whole of the reservoir.

## Methods & Flies

The most successful patterns were gold head montana, hares ears, damsel nymph, ace of spades, diawl bachs, orange blob, black fritz, cats whisker, lead bugs, claret popper hopper and black hoppers.

Most fish have been caught whilst drifting across deeper areas of the lake and also using dry flies on the surface above the weed beds towards the edges of the reservoir.

## Win a Prize!

River Gwash Trout Farm have kindly donated a tagged fish. This rainbow trout was released into Carsington Water in May 2014. There is a prize of a bottle of whiskey for the first angler to catch the tagged fish. You will find the tag on the dorsal fin, marked by the red arrow on the photo. All you need to do is take a photo of the tag and fish or write down the code on the tag. The fish can be released as long as it is not damaged. Let the fishery warden know that you have caught the fish asap on the day.

Good Luck!
