Carsington Fishing Report

28th July 2014

We have seen a slight improvement in the rod average this week. A number of our regular anglers fished the water on Thursday and produced a rod average of 10 between them!
Perhaps the cooler, wet weather forecast for the weekend will help improve the fishing.

Rod Average

The rod average for this week was **2.94** with 91 fish caught by 31 anglers.

Best Rainbow/Brown

The heaviest rainbow caught this week was 4lbs 11oz by Phil Harding at the North End on a black hopper.
The heaviest brown caught was 1lbs 8oz caught by Brian Rushton at Millfields.

Top Spots

The most successful areas have been North End, Dam Wall, Brown Ale Bay, Millfields. Fish have been reported over the whole of the reservoir.

Methods & Flies

The most successful patterns were gold head montana, hares ears, damsel nymph, ace of spades, diawl bachs, orange blob, black fritz, cats whisker, lead bugs, claret popper hopper and black hoppers.
Most fish have been caught whilst drifting across deeper areas of the lake and also using dry flies on the surface above the weed beds towards the edges of the reservoir.

Win a Prize!

River Gwash Trout Farm have kindly donated a tagged fish. This rainbow trout was released into Carsington Water in May 2014. There is a prize of a bottle of whiskey for the first angler to catch the tagged fish. You will find the tag on the dorsal fin, marked by the red arrow on the photo. All you need to do is take a photo of the tag and fish or write down the code on the tag. The fish can be released as long as it is not damaged. Let the fishery warden know that you have caught the fish asap on the day.
Good Luck!
